Silos and storage systems

Silos manufactured for each project at our facility in Türkiye.

Storage Silos

We design and manufacture storage silos for cement, gypsum, calcite and other bulk materials, as well as water storage silos, for each project at our facility in Türkiye.

01

Choose capacity and type

Tell us the capacity you need and the silo type: stationary, mobile or bolted.

02

Share site details

Send the material to be stored, site dimensions and installation conditions; we size the silo for your project.

03

Quotation and lead time

Price and lead time come directly from the manufacturer; we prepare the export shipment.

Why Ulmet for silo systems?

As one of Europe's largest silo manufacturers, we design every silo for its project and build it at our facility in Türkiye.

01

40–150 tonnes

40, 50, 70 and 100-tonne storage silos and a 150-tonne water storage silo.

02

Stationary, mobile, bolted

The right silo type for your site and transport conditions.

03

Sized for your project

Diameter and height are designed for your project; for cement, gypsum, calcite and bulk materials.

04

Protected surface

Primer and top coat for a long-lasting, protected surface.

01

Stationary cement silos

Welded, one-piece 40, 50, 70 and 100-tonne cement silos. Diameter and height are set by the project.

Stationary cement silos

Silo type	Stationary (welded, one piece)
Diameter	Determined per project
Design	Project-specific design and manufacture
Silo equipment	Filter, level indicators, safety valve: per project
Stored materials	Cement, gypsum, calcite and other bulk materials
Height	Determined per project
Surface finish	Primer and topcoat paint

Part no.	Product	Capacity	Storage volume
ULM 30001	40-Ton Cement Silo	**40 t**	**34 m³**
ULM 30003	50-Ton Cement Silo	**50 t**	**43 m³**
ULM 30004	70-Ton Cement Silo	**70 t**	**59 m³**
ULM 30005	100-Ton Cement Silo	**100 t**	**78 m³**

02

Mobile cement silos

A towable mobile cement silo for frequently relocated sites and temporary plants.

ULM 30002

40-Ton Mobile Cement Silo

Capacity	40 t
Silo type	Mobile
Diameter	Determined per project
Design	Project-specific design and manufacture
Silo equipment	Filter, level indicators, safety valve: per project

Storage volume	30 m³
Stored materials	Cement, gypsum, calcite and other bulk materials
Height	Determined per project
Surface finish	Primer and topcoat paint

03

Bolted cement silos

Shipped in sections and bolted together on site; for remote and hard-to-reach sites.

ULM 30006

100-Ton Bolted Cement Silo

Capacity	100 t
Silo type	Bolted (assembled on site)
Diameter	Determined per project
Design	Project-specific design and manufacture
Silo equipment	Filter, level indicators, safety valve: per project

Storage volume	84 m^3
Stored materials	Cement, gypsum, calcite and other bulk materials
Height	Determined per project
Surface finish	Primer and topcoat paint

04

Water storage silo

A 150-tonne water storage silo built for concrete plants and industrial facilities.

ULM 30007

150-Ton Water Storage Silo

Capacity	150 t
Stored materials	Water
Height	Determined per project

Product type	Water storage silo
Diameter	Determined per project
Design	Project-specific design and manufacture
